PROFILE

Full-Stack Engineer with 4 years of experience building scalable, event-driven systems using Java, Kotlin, and Spring Boot across distributed teams. Proven track record delivering 200+ production features in both monolithic and microservices architectures for trading platforms, banking systems, alarm management system, etc. Strong foundation in backend development (REST/GraphQL APIs, distributed systems, databases) now expanding frontend capabilities with React.js to enable end-to-end product ownership and rapid iteration.

WORK EXPERIENCE (Remote & Contracting)

11/2025 – Present	Freelance Full-Stack Web Developer <i>Self-Employed</i>
04/2025 – 11/2025 Remote, Slovakia	Backend Software Engineer (Contractor) <i>ADUS Technologies s.r.o</i> Project – AI-Driven Trading Application <i>AI-Driven Trading Application</i> Built core backend infrastructure for a real-time trading intelligence platform delivering AI-generated signals across crypto, forex, and futures markets. Completed 70+ end-to-end tasks over 6 months in a fully remote environment. <ul style="list-style-type: none">Developed real-time trading signal pipelines using RabbitMQ, WebSockets, PostgreSQL, and MongoDB, enabling sub-second latency for high-frequency trading users.Owned complete feature lifecycle from system design and API modeling through testing and deployment to dev/test environmentsDelivered revenue-critical features including community chat, Stripe subscription billing, and push notifications (OneSignal) directly supporting platform monetizationImproved platform stability by implementing integration test coverage for critical API flows, reducing post-deployment regressions by 40%Designed and maintained database migrations for PostgreSQL and MongoDB, including custom JavaScript migration scriptsCollaborated with PMs, QA, Frontend Developers and stakeholders to ensure alignment on requirements and delivery timelines
08/2024 – 03/2025 Remote, Qatar	Backend Software Engineer (Contractor) <i>Noema Consulting</i> Contributed to a large-scale banking system with 240+ microservices in a 10-member Agile team with daily Scrums. <ul style="list-style-type: none">Delivered 80+ tasks across 10+ microservices, shipping critical bug fixes and features that improved system stability and business workflowsDesigned and maintained RESTful and GraphQL APIs using Kotlin and Spring Boot, ensuring scalable service communicationIncreased test coverage by writing comprehensive unit and integration tests (including OpenFGA integration), reducing production bugsEarned Azure Developer Associate (AZ-204) certification, demonstrating commitment to cloud proficiency and continuous learningConsistently met tight deadlines under pressure while maintaining code quality standards
05/2023 – 12/2023 Remote, Austria	Backend Java Developer (Contractor) <i>Candidatis GmbH</i> Sole backend engineer responsible for maintaining and evolving a JobAd platform serving users across Austria and Germany. <ul style="list-style-type: none">Optimized Spring Boot web crawler, reducing runtime by 30% and improving data freshnessIntegrated REST and GraphQL APIs to enhance platform interoperability and third-party integrationsMentored junior developer, ensuring smooth knowledge transfer and project continuity
11/2022 – 05/2023 Remote, Durres	Java Developer <i>Sabanet Albania</i> <ul style="list-style-type: none">Integrated external APIs and upgraded 8+ microservices from Java 11 to Java 17, applying SOLID design principlesContributed to 10+ microservice architecture handling service discovery, API gateway routing, and centralized configurationImplemented new microservice using Retrofit for seamless API integration

07/2021 – 10/2022 La Spezia, Remote	Java Fullstack Developer <i>Comdata Group</i> Joined as junior engineer and rapidly progressed to independently delivering features across the full stack. <ul style="list-style-type: none">Delivered 50+ frontend and backend tasks using ZK Framework (MVVM), Java 8, and Spring BootLeveraged PostgreSQL, Hibernate, and Spring Data JPA for robust data persistenceAchieved 90%+ on-time delivery rate with mentorship from mid-level engineer, demonstrating reliability and eagerness to learn

EDUCATION

2018 – 2020	Master of Science in Computer Science <i>University of Tirana</i> Final Grade: 8.1/10
2015 – 2018	Bachelor of Science in Computer Science <i>University of Tirana</i> Final Grade: 8.18/10

CORE SKILLS

Languages Java, Kotlin,SQL, JavaScript (ES6+)	Frameworks & Libraries Spring Boot, Spring Cloud, Spring Security, Spring Data JPA, Hibernate, GraphQL, Retrofit, Lombok, MapStruct, Feign Client, OneSignal API, Stripe SDK, OAuth 2.0, JWT (JSON Web Tokens), ZK Framework	Backend & Architecture Microservices, Event-Driven Systems, Distributed Systems, API Design (REST & GraphQL), API Integration	Databases PostgreSQL, MongoDB, SQL Server, SQL Query Optimization
Messaging RabbitMQ, Kafka, WebSocket/STOMP		Cloud & DevOps Azure, Docker, Kubernetes, Git, Docker Compose	Testing JUnit, Mockito, Integration Testing
Tools IntelliJ IDEA, Postman, Swagger/OpenAPI, Jira, GitHub, Maven	Frontend React.js, HTML5, CSS3, Tailwind CSS		

PERSONAL PROJECTS

12/2025	Personal Finance Tracker Built a real-world personal finance web application focused on daily usability , data persistence, and clean user flows. Key contributions & impact: <ul style="list-style-type: none">Designed and implemented an end-to-end system for tracking income, expenses, categories, and balances, with clear monthly insights.Added advanced features for : recurring transactions, spending insights, financial score and financial goals.Migrated the backend architecture from a custom Java/Spring Boot API to Supabase, simplifying authentication, data persistence, and user management while reducing operational overhead.Implemented real authentication, secure user isolation, and reliable data storage to support real usage (not just demo flows).Built a responsive, modern UI using React.js and Tailwind CSS, optimized for clarity, low cognitive load, and mobile usage.
02/2024 – 07/2024	Therapism AI-assisted mental health platform (Backend Only) integrating Zoom & Spring AI. 6,000+ LOC monolith with Spring Boot & Spring Security
06/2024 – 06/2024	Quotes Social Network REST backend for posting, commenting & liking features (Spring Boot, PostgreSQL). Integrated an external API for fetching the quotes.
11/2025 – 11/2025	Additional Projects: Restaurant Website, Quiz App, Weather App — built to practice HTML, CSS, and JavaScript fundamentals.

CERTIFICATION

- Microsoft Certified: Azure Developer Associate (AZ-204)
