PROFILE

Backend-focused Full-Stack Developer with 4+ years' professional experience shipping production software across fintech, trading, banking, and SaaS. Deep expertise in Java, Kotlin, and Spring Boot across monolithic and microservice architectures, with growing React.js capability enabling end-to-end ownership. Experience spans distributed systems, real-time data pipelines (RabbitMQ, WebSockets), REST/GraphQL APIs, and cloud infrastructure (Azure, Docker). Currently architecting and operating a live SaaS product (personal-finances.app) solo - demonstrating complete ownership from system design through payment integration and deployment.

PROFESSIONAL EXPERIENCE

Full-Stack Developer, Self-Employed 12/2025 - Present

- Sole architect, engineer, and operator of a live subscription SaaS: React + Tailwind frontend, Supabase backend (PostgreSQL, Auth, Edge Functions, Google OAuth) with Row-Level Security for strict per-user data isolation.
- Integrated Paddle billing for tiered subscriptions (free/premium) - handling webhooks, entitlement checks, and the full billing lifecycle and built the spending-insights dashboard, monthly financial-health score, and automatic recurring-transaction detection.
- Shipped the complete product solo in 5 months - from empty repository to a live, owning everything from system design through deployment and growth.

Backend Software Engineer (Contractor), 04/2025 - 11/2025
ADUS Technologies s.r.o - xBrataAI - AI-driven Alerts Platform Remote (Slovakia)

- Engineered the real-time signal-detection and alerting pipeline (RabbitMQ, WebSockets, PostgreSQL, MongoDB) that identifies multi-indicator confluences and delivers sub-second alerts to 10,000+ day traders across crypto, forex, and futures.
- Launched 5+ revenue-critical features including Stripe subscription billing, community chat, and push notifications via OneSignal, enhancing user engagement and monetization.
- Owned full feature lifecycle: requirements analysis → API modeling → testing → deployment
- Delivered 70+ end-to-end tasks in 7 months while reducing post-deployment regressions by 40% through targeted integration test coverage.

Backend Software Engineer (Contractor), 08/2024 - 03/2025
Noema Consulting - Enterprise Banking System Remote (Qatar)

- Designed and evolved REST and GraphQL APIs in Kotlin and Spring Boot within a 240+ microservice enterprise banking platform, working in a 10+ person Agile team.
- Strengthened access-control reliability across critical banking services by adding 50+ OpenFGA tests covering authorization roles, guarding the platform against authorization regressions in production.
- Resolved high-priority defects across 10+ microservices
- Earned the Microsoft Certified: Azure Developer Associate (AZ-204) certification during the engagement.

Backend Java Developer (Contractor), 05/2023 - 12/2023
Candidatis GmbH - JobAd Platform (Austria & Germany) Remote (Austria)

- Sole backend engineer for a job-advertisement platform serving Austria and Germany, owning REST/GraphQL integration with third-party services and mentoring a junior developer.
- Cut the Spring Boot web crawler's runtime by 30%, materially improving the freshness of job-listing data across the platform.

Java Developer, Sabanet Albania - Alarm Management System 11/2022 - 05/2023
Remote (Durrës)

- Owned and extended a 10+ microservice alarm-management system (service discovery, API-gateway routing, centralized configuration) and added a Retrofit-based microservice for third-party API integration.
- Modernized the platform by migrating 8+ microservices from Java 11 to Java 17 under SOLID principles, improving long-term maintainability and security posture

Java Full-Stack Developer, Comdata Group

07/2021 - 10/2022

- Delivered full-stack features and implemented the data-persistence layer (PostgreSQL, Hibernate, Spring Data JPA) for the product.
- Sustained a 90%+ on-time delivery rate while progressing from junior to independently owning full-stack features end-to-end.

Remote (Italy)

EDUCATION**MSc Computer Science, University of Tirana**
8.1/10

2018 - 2020

BSc Computer Science, University of Tirana
8.18/10

2015 - 2018
