PROFILE

Backend-focused Full-Stack Developer with 4 years of professional experience shipping production software across fintech, trading, banking, and SaaS. Deep expertise in Java, Kotlin, and Spring Boot, including monolithic and microservice architectures combined with growing frontend capability in React.js that enables true end-to-end product ownership.

Proven track record delivering 200+ features across distributed systems, real-time data pipelines (RabbitMQ, WebSockets), GraphQL/REST APIs, and cloud infrastructure (Azure, Docker). Currently operating a live SaaS product (personal-finances.app 🌐) - architected, developed, and deployed solo - demonstrating complete ownership from system design through payment integration and user-facing UI.

PROFESSIONAL EXPERIENCE

Full-Stack Developer, Self-Employed 12/2025 - Present
• Designed, built, and operate personal-finances.app 🌐 as a solo venture

Backend Software Engineer (Contractor), 04/2025 - 11/2025
ADUS Technologies s.r.o - AI-Driven Trading Platform Remote (Slovakia)
• Engineered real-time trading signal pipelines using RabbitMQ, WebSockets, PostgreSQL, and MongoDB
• Achieved sub-second latency for a platform serving 10,000+ users across crypto, forex, and futures markets
• Shipped revenue-critical features including Stripe subscription billing, community chat, and push notifications via OneSignal
• Owned full feature lifecycle: requirements analysis → API modeling → testing → deployment
• Delivered 70+ end-to-end tasks in 7 months while reducing post-deployment regressions by 40% through targeted integration test coverage

Backend Software Engineer (Contractor), 08/2024 - 03/2025
Noema Consulting - Enterprise Banking System Remote (Qatar)
• Contributed to a production banking platform spanning 240+ microservices within a 10+ member Agile team
• Designed and maintained RESTful and GraphQL APIs using Kotlin and Spring Boot
• Improved OpenFGA authorization test coverage, reducing production bugs across critical services
• Resolved high-priority defects across 10+ microservices
• Shipped 80+ features while earning the Microsoft Certified Azure Developer Associate (AZ-204) during the same engagement

Backend Java Developer (Contractor), 05/2023 - 12/2023
Candidatis GmbH - JobAd Platform (Austria & Germany) Remote (Austria)
• Served as sole backend engineer maintaining and evolving a job advertisement platform for Austria and Germany
• Integrated REST and GraphQL APIs enhancing interoperability with third-party services
• Mentored a junior developer, ensuring smooth knowledge transfer and project continuity
• Optimized the Spring Boot web crawler, cutting runtime by 30% and significantly improving job listing data freshness

Java Developer, Sabanet Albania - Alarm Management System 11/2022 - 05/2023
Remote (Durrës)
• Upgraded 8+ microservices from Java 11 to Java 17, applying SOLID design principles throughout
• Contributed to a 10+ microservice architecture covering service discovery, API gateway routing, and centralized configuration
• Added a new microservice using Retrofit for third-party API integration, extending platform capabilities without disrupting existing services

Java Full-Stack Developer, Comdata Group 07/2021 - 10/2022
Remote (Italy)
• Progressed from junior to independently owning full-stack features across 50+ tasks
• Implemented data persistence layer with PostgreSQL, Hibernate, and Spring Data JPA - maintaining 90%+ on-time delivery rate

EDUCATION

MSc Computer Science, University of Tirana
8.1/10

2018 - 2020

BSc Computer Science, University of Tirana
8.18/10

2015 - 2018

TECHNICAL SKILLS

Languages

Java, Kotlin, SQL,
JavaScript (ES6+)

Messaging

RabbitMQ, Kafka,
WebSocket/STOMP

Frameworks

Spring Boot, Spring
Cloud, Spring
Security, Spring Data
JPA, Hibernate,
React.js, Tailwind CSS

Cloud & DevOps

Azure, Docker,
Kubernetes, Docker
Compose, Git

APIs & Integration

REST, GraphQL, Stripe
SDK, Paddle,
OneSignal, Retrofit,
Feign Client OAuth,
2.0 JWT

Architecture

Microservices, Event-
Driven Systems,
Distributed Systems,
Monolith

Databases

PostgreSQL, MongoDB,
Supabase, SQL Server

Testing

JUnit, Mockito,
Integration Testing

FEATURED PRODUCT - Live SaaS Product

Personal Finance Tracker - personal-finances.app, Full-Stack Developer

12/2025 - Present

- Subscription SaaS application helping users track spending, set budgets, and improve financial health. Sole developer - from system architecture through deployment.
- Architected and built the complete system end-to-end: React.js + Tailwind CSS frontend, Supabase backend (PostgreSQL + Auth + Supabase Edge Functions + Google OAuth) with Row Level Security for strict user data isolation.
- Integrated Paddle payment system for subscription billing with tiered pricing (free / premium), handling webhooks, entitlement checks, and billing lifecycle management.
- Implemented advanced features: spending insights dashboard, monthly financial health score, automatic recurring transaction detection, and smart budgets/goals.

CERTIFICATION

- Microsoft Certified: Azure Developer Associate (AZ-204)
